## CP136 & CP116 DIGITAL ENSEMBLE PIANOS

Advanced Technology... Classic Styling

The Concert Performer Series digital ensemble pianos have been designed to provide you with the ultimate music experience, whatever your playing ability.

CP136

### SOUNDS

The CP Series Ensemble Pianos have hundreds of instrument and vocal sounds from which to choose (over 1000 on CP136 and over 600 on CP116). Sounds are organised into instrument "families" and accessed by the Sound category buttons. The Feature sound category is a special collection of the most expressive solo acoustic instruments. These sounds are excellent for playing melodies or improvisations.

### REALWOOD CABINET DESIGN

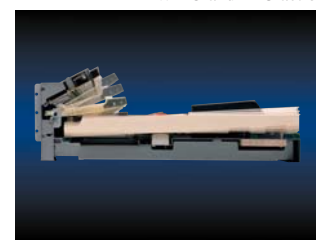

Finished in a chic rosewood colour, the Half-Gloss RealWood Cabinet of superior quality is designed to compliment the traditional furniture in your home. (CP136)

### TOUCH

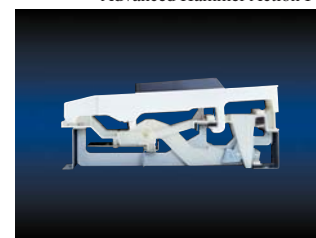

Kawai's AWA Grand PRO wooden-key action closely reproduces the characteristics of Kawai's acclaimed EX Concert Grand Piano. The hammer weight is graded from top to bottom to replicate the dynamic weight curve of the EX Concert Grand Piano. Additionally, the bass keys are counter-balanced to create a more even static weight curve. This combination of graded weights and counter-balances gives the AWA Grand PRO action a remarkably realistic feel throughout the dynamic ranges.

AWA Grand PRO action

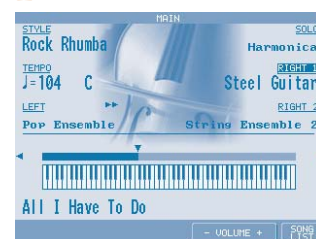

The Advanced Hammer Action IV with Acoustic Reaction technology (AR Technology) is Kawai's most realistic graded-hammer action ever. The AR technology brings several technical improvements and innovations to the CP116's action. The result is an action that provides a more life-like feel and gives you more control of dynamic expression from pianissimo to fortissimo.

Advanced Hammer Action IV

### SONG STYLIST

The Song Stylist feature provides perfect panel setups for hundreds of the most popular songs of all time (1000 songs on CP136 and 514 songs on CP116). Simply touch the button beside your favorite song and you're ready to go. Spend your time playing instead of pushing buttons.

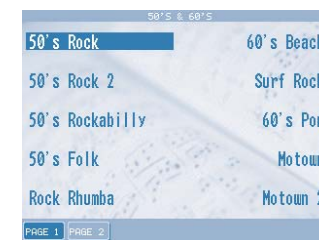

### MIC HARMONY AND EFFECTS

The CP136 has a microphone input jack that you can use to plug in a microphone for singing while you play the instrument. You can also "mic" other instruments or plug other electric instruments into the microphone input. The Mic Harmony and Effect buttons add various harmonies and effects to your mic input.

### STYLES

The CP136 has 262 accompaniment styles (182 styles on CP116) to help your music sound polished and professional. Styles are organized into musical "genres" and are accessed by the Style category buttons. The 1 - 2 Play button easily provides an appropriate "setup", including right and left-hand sounds, for the selected accompaniment style.

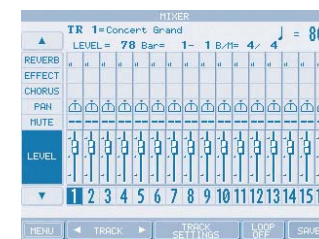

### CONCERT MAGIC

Concert Magic is a fun and interactive way to play music, even if you've never played before. With Concert Magic, anyone can experience the thrill of playing real music. Many of the Concert Magic songs also offer lyrics... just follow the bouncing ball for hours of Karaoke-style musical fun.

### RECORDER

Just press the Record button and you're ready to make your own recordings. For more professional results, the Advanced Recorder puts a full-featured, 16-track recording studio at your fingertips.

### CD-RW DRIVE

The CP136 is the digital piano with a recordable audio CD drive. You can record a CD of your "live" playing, internal songs or MIDI files (or any combination). You can even record vocals and other instruments via the Mic Input. Your completed CD can be played in any audio CD player.
